

O.T.B. PROFESSIONAL T-1181 KIT

T- 1170

T- 1179
Hex Set Screw

T-1171

T-1173

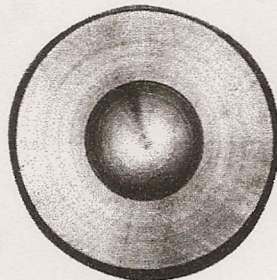

T-1174

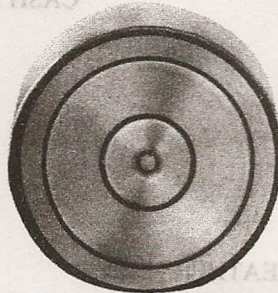

T-1175

T-1177

T- 1176

T- 1178

T- 1244

You can order each of these tools individually or get all of them in the **T-1181 Kit**.

The 10 part kit contains:

T- 1170 Master Die Holder with Screw and Wrench (use with all 6 dies).

T- 1171 Peening Die (Sets 1969, HM, & 252 Rivets).

T- 1173 Die for Large Tubular Rivets (Sets HM & 252 Rivets).

T- 1174 Die for Small Tubular Rivets (Sets 1969 Rivets).

T- 1175 Regular Durable Die (to set button and eyelet).

T- 1176 Regular Durable Anvil (rest button on one side and rest eyelet on the opposite side)

T- 1177 Baby Durable Die (to set button and eyelet).

T- 1178 Baby Durable Anvil (rest button on one side and rest eyelet on the opposite side).

T- 1179 Hex Set Screw.

T- 1244 Split Rivet Die (Sets 100, 151, & 157 Split Rivets, 197, 312 & 370 Bottom Studs).

You can do so many jobs with the tools in this kit that you will be using it every day.

- * Set regular and baby durable snap fasteners.
- * Set split rivets.
- * Set popular size tubular rivets.
- * Set locks, catches, hasps, studs, handle loops, etc. where "peening" is required.

Each of the 6 dies slip into the master die holder. Tighten with allen or hex wrench, and strike with mallet.

Setting dies (6) are hardened tool steel, oxidized and oil coated to prevent rust. Anvils (2) are industrial aluminum for durability.

You may purchase the entire kit or any of its components individually.

Either way you will be saving a great deal of money.
